██████████ and her husband ██████████ are leaders of a prostitution and child molesting and sex trafficking syndicate known as the Ashley Madison network. A large majority of the funding for said network is held in the accounts of capital investors and property they have acquired. Much of the property is used to house people with radio transmitters. These transmitters send a signal of RF, audio and video that are used to make people receive the signal in a way that interferes with their central nervous system. These transmitter people use extensive conditioning techniques to make people experience tactile, auditory and visual hallucinations. It is used extensively to molest children. These transmitters often are readily visible from the street as a satellite dishes. Between the radio signal that is recorded of a person near a transceiver and the conditioning, people who hear the transmission begin to experience sensations similar to the person who made the recording. This Ham Radio technique makes it seem as though people are hearing voices and feeling these other hallucinations that often resemble sexual interactions with other people. This technology is what was used to communicate to and harass Jeffrey Epstein while in prison. Driving people to commit suicide is a common practice with these transmitters. They also frequently attempt to replicate break-ins and home invasions. For some reason, people who have them meddle in the lives of others and attempt to cause as much harm as possible.

Capital firms and private capital corporations hold most of the funds that are used by this system. ██████████ from ██████████ has been involved for many years. He allegedly approves the lending of capital he knows should not be approved from ██████████ and he has directed other employees to participate in fraudulent transfers that facilitate the illicit movement of capital. The entire ██████████ family is involved. ██████████ has been molesting children using the radio and using the associated network of child molesters for decades. Almost all of the family's wealth is derived from this network. They have recently amassed tens of millions of dollars of real estate in recent months from transactions with other beneficiaries. Their children, ██████████ and ██████████ are also involved. ██████████ used to live in the transmitter apartment next door to mine. I saw her in it having a meeting with ██████████ the owner and other people involved in the ██████████ group of the National Ashley Madison sex trafficking network. The ██████████ family coordinated groups from all over the county to converge in NYC over the last two years. I saw ██████████ husband, ██████████, entering that apartment in August (?) 2019, even though he is not now nor has he ever been the tenant. I also saw ██████████ and her Paramore, ██████████ enter the same apartment when ██████████ (aka ██████████) was the tenant in 2018. Eric and his brother ██████████ are transmitter people and that apartment is used for transmitting and for prostitution. The current resident, ██████████ also transmits from that apartment. The neighbor across the hall, ██████████, also transmits from his apartment. The owner of that apartment, ██████████, also has knowledge of the situation and transmits from his other apartment.

There are hundreds of apartments involved. The "original" transmitter apartment in this building is Apt. 8A. It is ostensibly owned by a man named R ██████████. ██████████ father acquired the apartment when his son was a teenager, after his son's participation in the underage prostitution organization. The company that owned the apartment, ██████████ had prostitutes and their relatives sign for apartments under the auspices of acting as a corporate representative. However, over time they treated the apartments as though they were owned by the individuals. These apartments were often accumulated and transacted with by the recipients. Over time, they accumulated a huge amount of real

estate and cash. Some of the proceeds are offshore (see the Panama Papers). There is a huge amount of real estate that is allegedly owned by this company that is in the hands of other people and companies. Apartment 7A has been owned by [REDACTED] since he was 17 years old. The Penthouse apartments are both involved. There are transmitter people in almost every apartment in the building. Also, on the 4th floor, there is a computer containing an immense child pornography library. It is the same material that Jeffrey Epstein kept and used as kompromat.

Many of the wealthy and well-known people that were personal associates of the late Jeffrey Epstein are still involved in the organization. Many of the most problematic are wealthy, aristocratic art patrons with eponymous museums. [REDACTED], son of [REDACTED] and [REDACTED], of the [REDACTED] manages a major portion of the funding at Deutsche Bank.
